

Welcome to the 2019 Melbourne Business Analytics Datathon

Mac - Remote Desktop Installation

Go to the app-store on your Mac and search for Microsoft Remote Desktop 10

It should look like the image shown

Install this and you are ready to configure your connection on the day of the Datathon

Mac - Remote Desktop configuration – on the Day

Click “plus” button to add a new connection

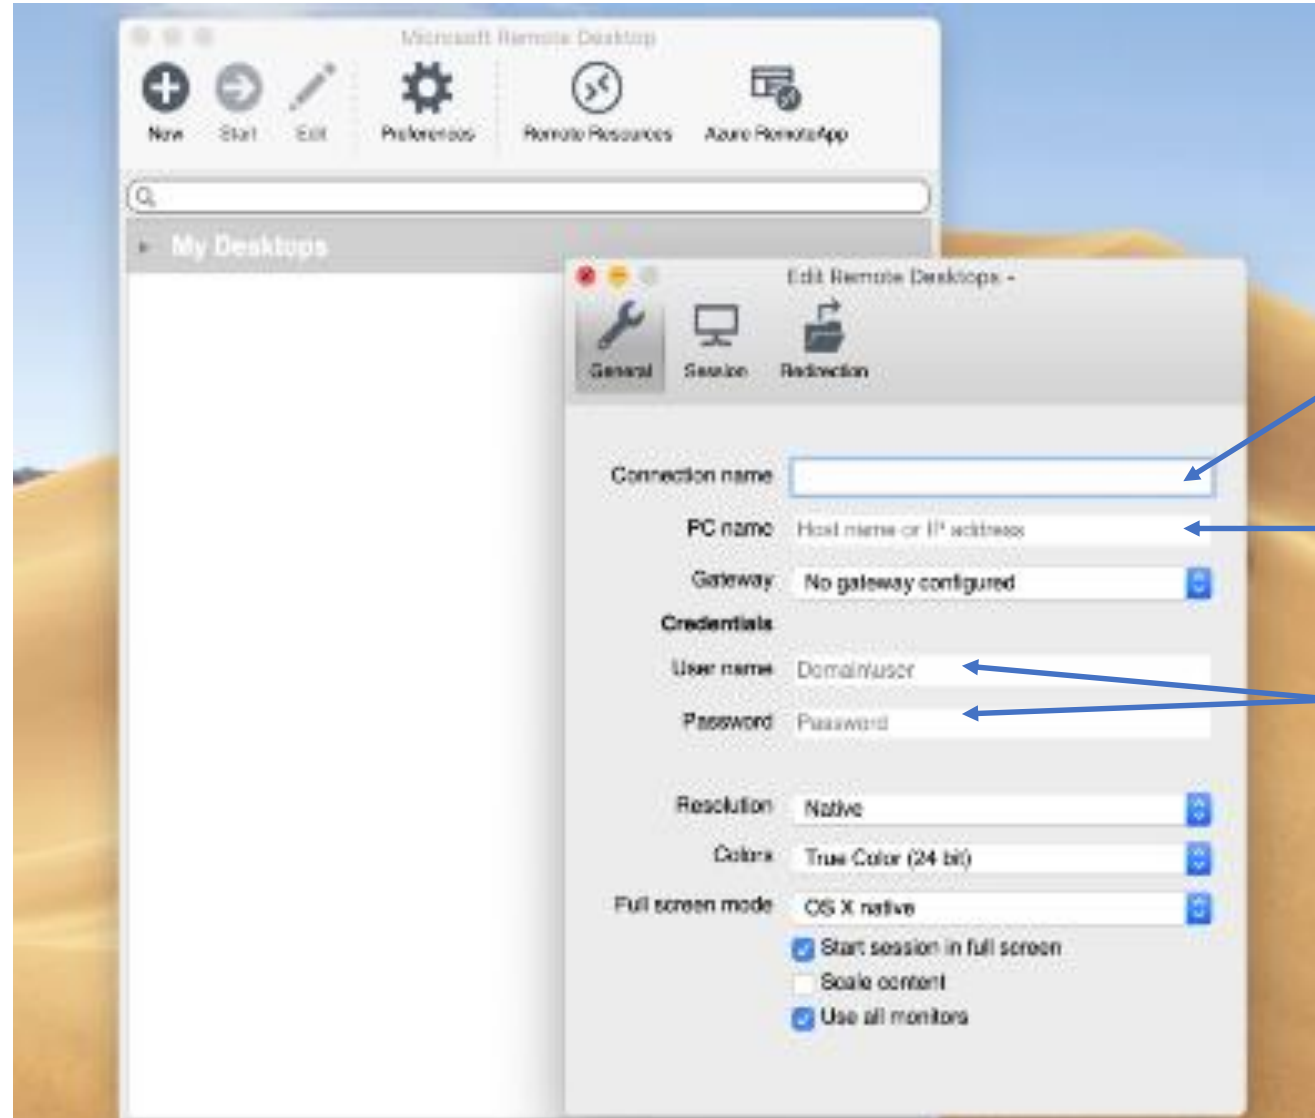

The Datathon advice email will contain the computer name or IP address, username and password for your remote desktop connection

Add any name you like in the connection name

In PC name type the IP address or computer name

Username and Password fields enter the remote access credentials supplied in the same email

Once you have saved this it will appear in the connection list

Type the connection name such as Datathon or your team name

Type the network address or computer name provided in your Datathon email

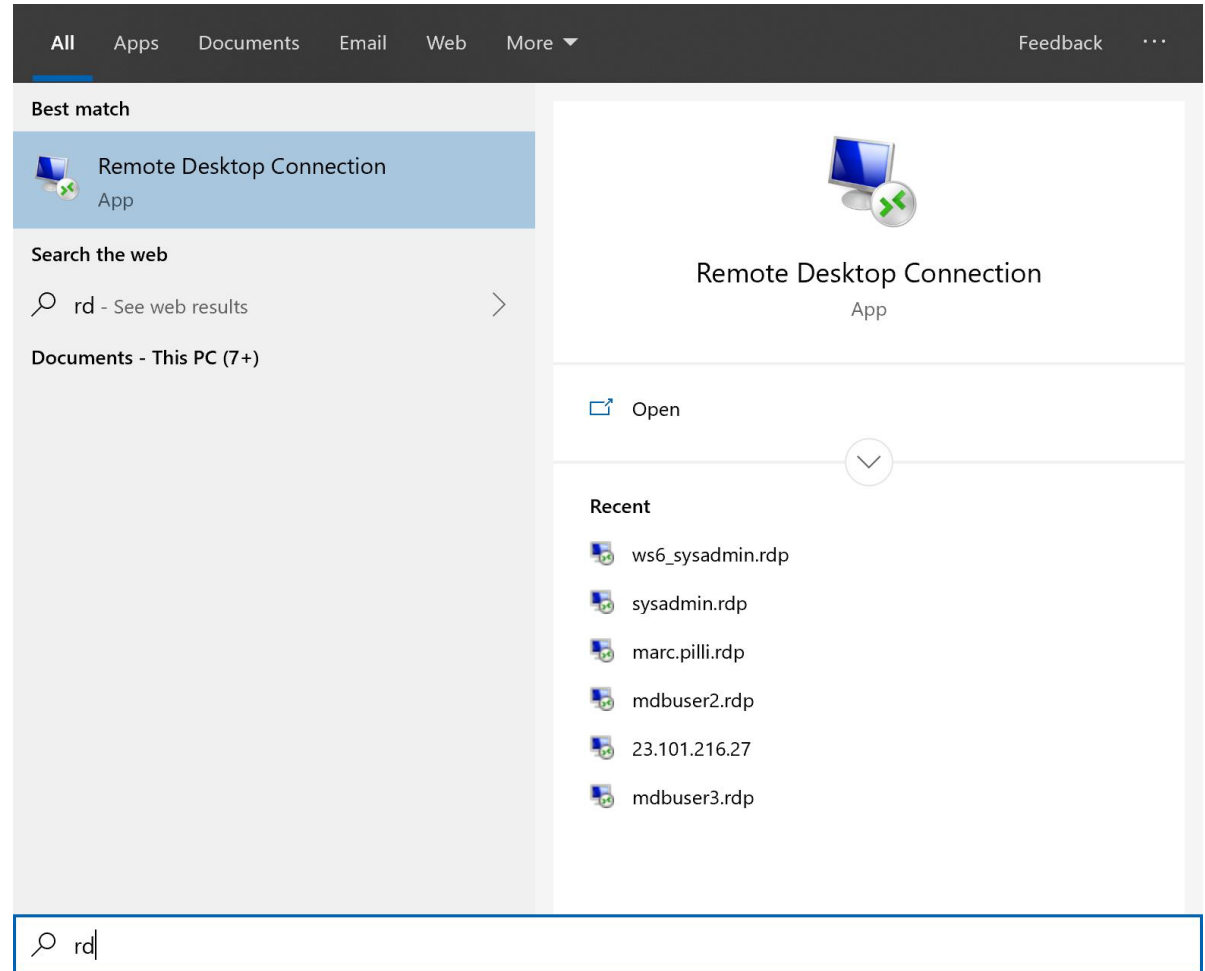

Type the username and password provided in your Datathon email

PC - Remote Desktop configuration – on the Day

All windows versions come pre-installed with a remote desktop app.

Click the start button and type the “RDP” command the Remote desktop connection app will appear

Note: Older windows versions may need you to use MSTSC id RDP does not work

PC - Remote Desktop configuration – on the Day

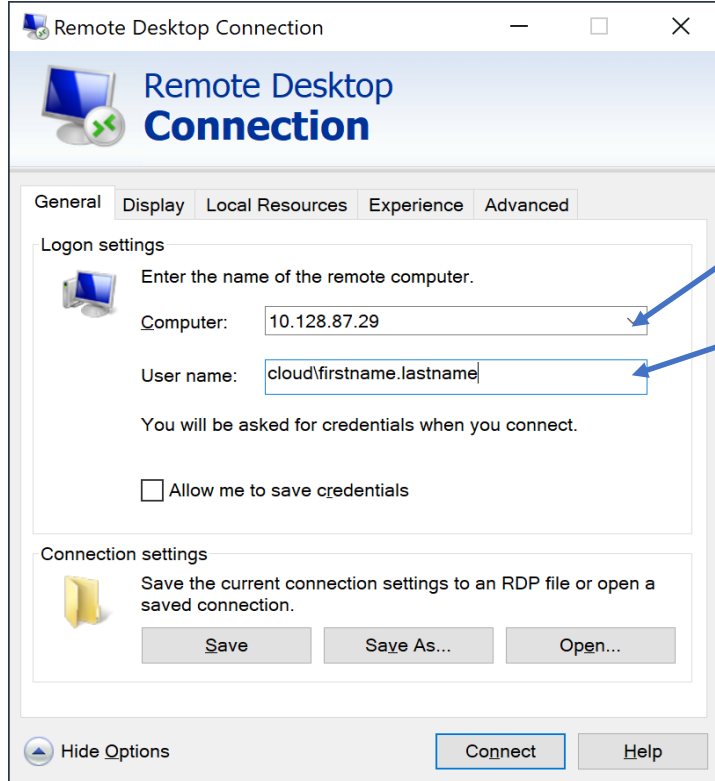

FIGURE 1

In the Computer field type the IP address or computer name provided in your Datathon advice email

DATALOSS_WARNING_README8/5/2017 12:43 AM

The Widows File Explorer lets you browse for files both in the local system or on a shared network drive

5:08 PM8/7/2019

Zetaris Lightning is the user interface for the Zetaris Cloud Data Fabric

The Cloud Data Fabric allows you to see all the hundreds of Datathon data files organized as virtual tables which can be joined, without moving any data, to create any view of the data you want

You can then query these virtual tables and download the results to your team folder (the E Drive) for use in Python, R

To access the Zetaris Lightning Login screen, simply replace the **team number** in figure 1 with the team number that you are allocated in your advice email.

At the login screen shown in figure 2, enter your Lightning username and password, provided in your advice email

No data to display

Once you have logged in, the first thing to do is to change your password by clicking your username in the top right corner and selecting the change password menu option.

If you have already done your Zetaris certification training you will be able to browse the data sources and start using them and even save some of your query results to your local Datathon team folder

4:20 PM

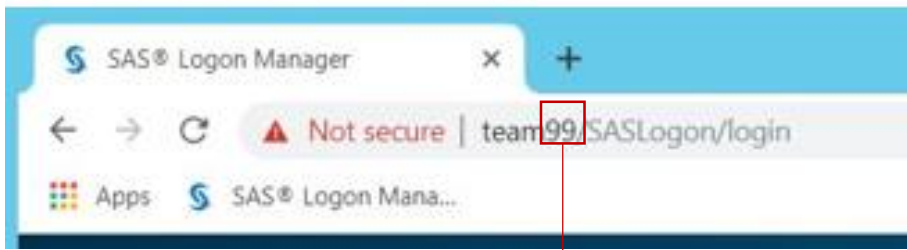

FIGURE 1

SAS is analytical software available to all team members and like lightning is also accessible through your browser

To access the SASLogin screen, replace the **team number** in figure 1 with the team number that you are allocated in your advice email.

One word of caution, please make sure the URL uses the same upper-case letters as shown, otherwise you will get an error

Once at the login screen as shown in Figure 2, use the same username and password that you already have for your remote desktop connection

SAS, like Zetaris will allow you to save any outputs your local Datathon team folder

Thanks for taking the time to watch this introduction, for more information on the how to use any of the Datathon apps, please go to the “get informed” link on this page
